The items, shown in the part list, provides the shown connection possibilities.

NOTE 1: Use the number of pipe nipple as delivered.  
Air at blower side will heat up,  
therefore first iron ducting required.

NOTE 2: Keep the ducting as short as possible.  
Use minimal quantity of bend(s) and hose.  
Every bend, joint, connector or system accessory  
contributes a certain loss of pressure  
(friction of moving air)
